

# Module 6 – Participation of Renewables in Electricity Markets

## Module introduction

**Pierre Pinson**  
Technical University of Denmark

[credits: Mediehuset Ingeniøren]

Through this module, it is aimed for you to be able to:

- 1 Explain **how to design a market participation strategy**
- 2 Calculate **revenues from market participation** (and compare them to optimal potential revenues)
- 3 Formulate and solve a **newsvendor problem**

## Module outline

Module 6 is based on 3 video lectures and associated self-assessment quizzes:

**6.1 What is a market participation strategy?**

**6.2 Decision-making under uncertainty**

**6.3 Offering renewable energy under uncertainty**

Good luck with Module 6!
